

ABSTRACT OF THE DISCLOSURE

A lockable storage case includes a top cover pivotably
5 coupled to a bottom cover through a spine. The top
cover includes loops or an upper lock receiving member
and a lower lock receiving member defining a top cover
lock insertion path. The bottom cover includes loops
or an upper lock receiving member and a lower lock
10 receiving member defining a bottom cover lock insertion
path. The lower lock receiving members of both the top
and bottom covers include hooks for receiving and
maintaining a latch. When the top cover is closed on
the bottom cover, the top and bottom cover insertion
15 paths combine to form a combined lock insertion path.
A lock for the storage case includes first and second
catch mechanisms with first and second catches. To
lock the storage case, the lock is inserted into the
combined lock insertion path so that the catches on the
20 lock mate with and are retained with the hooks in the
top and bottom covers.
